Personal Information

Foreign Language: English
Date of Birth: 01/12/1999
Place of Birth: Istanbul
Marital Status: Single
Driving Licence: B

Education

2017 – 2021
Sakarya University – Electrical and Electronics Engineering
GPA: 3.11/4
2016 – 2017
Bağcılar Final Basic High School
GPA: 81.29/100

Software Skills

- Knowledge on .NET technology.
- Knowledge on **Angular**.
- Knowledge on **JavaScript, TypeScript**.
- Programming on **C#, C, Embedded C**.
- Knowledge on **SQL, T-SQL**.
- Pretty good knowledge on **OOP, SOLID, Layer architecture, Onion architecture**.
- Pretty good knowledge on **Ef Core**(DBFirst, CodeFirst).
- Knowledge on **JWT, Authentication /Authorization, Web API**.
- Pretty good knowledge on Creating **Custom Services**

Eyüp Kayatuzi

Experiences

08.2023 – Present

Software Developer • VeriPark  VERIPARK

Job description:

As a Software Developer at VeriPark, I am actively involved in leveraging **.NET** technology on the backend. My responsibilities include working with **Angular** technology on the frontend and utilizing Microsoft **SQL** Server as the database. I contribute to the development and enhancement of demo projects at VeriPark, ensuring seamless integration of both frontend and backend technologies.

01.2023 – 08.2023

Full-Stack Program • BilgeAdam Technology 

Job description:

SOLID, Layer architecture, OOP, WFA, Microsoft SQL Server, Ef Core, Ado Net, HTML5, CSS, JavaScript, Asp.Net Core, Asp.Net MVC, JQuery, JWT, Web Service Api, Ajax, Authentication /Authorization

01.2022 – 01.2023

Software Developer • Noor UVC Technology 

Job description:

I worked on .Net apps technologies as **Asp.Net MVC** and worked on C with MCUs.

06.2021 – 08.2021

Intern • Baykar Defense 

Job description:

I worked in Baykar's Weapon Systems Team.

- Knowledge on **Azure Devops/Portal Agile and Scrum, Cloud Database**.
- Knowledge on **Microsoft Sql Server**.
- Pretty good knowledge on **Front-end with HTML5, CSS, Bootstrap5, JQuery, Ajax Etc**.
- Pretty good knowledge on **Asp.Net Core, ASP.NET MVC**.

Projects

Project Name: Internet Banking Applications
During my tenure as a Software Developer in Veripark's demo team, I had the opportunity to contribute to numerous internet banking applications. In these projects, I specialized in utilizing .NET on the backend, Angular on the frontend, and MS SQL as the database technology.

Project Name: Human Resources Application
The Human Resources Project was developed on Azure Devops with agile scrum methodology. In addition, in this project, it was developed on onion layer architecture and SOLID principles were considered. This project has authentication and authorization to log in as company manager and personal roles..

Project Name: Sale Website For Hamburger With Asp.Net Core MVC

This project aimed to authentication and authorization for a user and Asp.NetCore.Identity is used for this. Also this project keeps orders, users and sale informations in database. Also javascript and jquery blocks are used for dynamic page design.

Project Name: FreshFit Diet App

Using efcore codefirst principle and wfa core at visual studio this Project has been develop on layered architecture. This Project can keep tracking of user's Daily meals and Daily activities and quantity of water which are consumed by user.

Project Name: Hamburger Tracking App

Purpose of this Project is for employees can easily keep tracking all orders and payments for customers. Also user can see daily earnings, quantity of orders and all kind of order for each menu.

Project Name: IOT Application With ESP8266

Using ESP01 wifi module and SAMD21 Xplained Pro board, I created a system which can send data to thingspeak service on TCP/IP with Bare Metal
